DATA ANALYST, flexible minded, inquisitive nature, intuitive problem-solver. Background of collaborative, fast-paced healthcare setting assisting others in adaptation after significant life change. Eager to transition to analytics role. Strong interpersonal and written communication skills. Values research-motivated decision making to best touch lives and impact the world.

SKILLS

- Data Cleaning & Preparation
- Exploratory & Descriptive Analytics
- Integrating & Transforming Data
- Querying, Filtering, Sorting, & Grouping
- Performing Statistical Analysis, including Linear Regression
- Writing Technical Documentation & Reports
- Data Visualizations & Dashboards
- Machine Learning (supervised/unsupervised algorithms)
- Problem Solving
- Communication/Collaboration
- Presentation Skills
- Organization
- Spanish Proficiency

TOOLS

- Python
- Jupyter Notebook
- PostgresSQL
- Excel
- PowerPoint
- TensorFlow
- Keras
- Tableau
- Github

DATA ANALYTICS PROJECTS

- **Instacart Basket Analysis**:
  Data wrangling, merging, statistical analysis, and data visualization via python were used to present a final report with data results and recommendations for marketing strategies for the Instacart online shopping platform (mock data).
- **ClimateWins Weather Prediction:**
  Machine Learning algorithms were utilized within Python to analyze and make predictions generated from real weather data from 16 weather stations in Europe. Purpose was to support usefulness of machine learning in future weather predictions that can be applied and generalized to other parts of the world.
- **Rockbuster Stealth Video Game Analysis**:
  Data cleaning, joins, filtering, & subqueries via PostgreSQL and Tableau visualizations were utilized in this analysis of mock video rental data to answer questions about customers while gaining an understanding of sales motivations from varying regions in the world to make recommendations for video sales moving forward.

EDUCATION:

- **Data Analytic Certification** — October 19, 2024
  - Intro to Data Analytics — Jan 24, 2024
  - Data Immersion — August 15, 2024
  - Machine Learning with Python — October 19, 2024
- **Master of Occupational Therapy** — December 2008
  Midwestern University, Downers Grove, Illinois
- **Bachelor of Arts in Psychology** — May 2006
  Dominican University, River Forest, Illinois

WORK EXPERIENCE:

- **Occupational Therapist** — June 2011- present
  Advocate Lutheran General Hospital, Park Ridge, IL
  - Deliver comprehensive evaluations and specialized rehabilitation for high-acuity patients within a Level 1 Trauma Center, spanning inpatient rehab and all acute care units.
  - Design custom compensatory strategies and treatment plans to facilitate patient independence and successful discharge.
- **Occupational Therapist** — August 2025 – present
  NSSEO (North Suburban Special Ed
  - Direct data-driven therapy services and evaluations; translate assessment findings into actionable, measurable student growth targets.
  - Manage ongoing data tracking and reporting to ensure program compliance and drive evidence-based interventions.
- **Occupational Therapist** — August 2019 - May 2020
  SensAble Kids, Chicago/Ravenswood, IL
  - Provided evaluative and rehabilitative services for pediatric populations; partnered with families to implement home and school-based strategies that enhanced functional independence in daily routines.
- **Occupational Therapist** — January 2009 - June 2011
  PeopleFirst Rehab, Bensenville, IL
  - Provided evaluative and rehabilitative services for geriatric populations; coordinated all logistical scheduling for home visits and therapeutic groups.
